

Interim Management Statement First Quarter Results 2016

CEO Casper von Koskull's comments on the results:

"The business environment has been relatively stable at the beginning of 2016, although turmoil on the financial markets, and even lower interest rates, have put pressure on revenues. Costs are under strict control and are developing according to plan, and loan losses were below the 10-year average of 16 basis points. Given the environment the result is acceptable. The Common Equity Tier 1 ratio increased to 16.7%.

In the past year we have significantly strengthened the functions and processes devoted to regulatory compliance. Since the requirements that Nordea must fulfil and the risks, to which we are exposed, are constantly changing, work on being compliant and improving risk management will be under constant development. However, all these efforts will only succeed if we continue to have a strong risk and compliance culture, in which values and ethical considerations are always an integral part of our business model. As CEO, I will take all actions necessary to ensure that we stay a safe and trusted partner."

(For further viewpoints, see CEO comment on page 2)

First quarter 2016 vs. First quarter 2015 (First quarter 2016 vs. Fourth quarter 2015)¹:

- Total operating income¹ -16%, in local currencies -14% (-7%, -7% in local currencies)
- Total expenses¹ -1%, unchanged in local currencies (-3%, -2% in local currencies)
- Operating profit¹ -29%, -27% in local currencies (-10%, -9% in local currencies)
- Common Equity Tier 1 capital ratio 16.7%, up from 15.6% (up 20 basis points from 16.5%)
- Cost/income ratio¹ 51.3%, up from 43.7% (up 2.2 %-points from 49.1%)
- Loan loss ratio of 13 basis points, down from 14 basis points (down 4 basis points from 17 basis points)
- Return on equity¹ 10.3%, down from 14.3% (down 1.2 %-points from 11.5%)
- Diluted EPS EUR 0.19 vs. EUR 0.27 (EUR 0.19 vs. EUR 0.21)

Nordea's vision is to be a Great European bank, acknowledged for its people, creating superior value for customers and shareholders. We are making it possible for our customers to reach their goals by providing a wide range of products, services and solutions within banking, asset management and insurance. Nordea has around 11 million customers, approximately 600 branch office locations and is among the ten largest universal banks in Europe in terms of total market capitalisation. The Nordea share is listed on the Nasdaq Stockholm, Nasdaq Helsinki and Nasdaq Copenhagen exchanges.

¹ Excluding non-recurring items (Q4 2015: gain from divestment of Nordea's merchant acquiring business to Nets of EUR 176m before tax and restructuring charge of EUR 263m).

CEO comment

First quarter 2016 Interim Management Statement

The business environment has been relatively stable at the beginning of the year, with the Swedish economy in particular continuing to perform well, while the Norwegian economy has slowed down due to the oil price development. However, volatility on financial markets and lower interest rates put pressure on revenues, which are down 16% compared to the strong start of 2015. Given the environment the result is acceptable.

Net Interest Income has been under severe pressure due to lower interest rates and low volume growth. Lending margins were stable, and going forward, we expect to see improving lending margins.

Customer activity on financial markets held up well in the quarter. However, spreads increased due to the turmoil and, in combination with low liquidity, the Net result from items at fair value decreased to EUR 332m from the high level of EUR 627m in the first quarter of 2015.

Costs are under strict control and decreased by 1% compared to the first quarter of 2015. The cost-to-income ratio increased to 51.3%, compared to 43.7% in the first quarter of 2015. We expect costs to increase by 3% in local currencies in 2016 and to remain on a largely unchanged level in 2017 and 2018.

Loan losses are down slightly to EUR 111m and well within the 10-year average of 16 bps. Impaired loans were up 2% due to a few new impaired customers in the oil segment and Danish agriculture. Our guidance for largely unchanged credit quality in the coming quarters remains intact. We expect some increases in loan loss provisions in oil and offshore-related loans, due to the low oil price.

The Common Equity Tier (CET) 1 ratio increased 20 bps to 16.7% compared to the previous quarter.

Delivering value to customers

We now have 23 e-branches, with the same services as a physical branch but with more flexible opening hours. One out of six customer meetings is now held online, almost a doubling compared to the first quarter of 2015.

Wholesale Banking had the largest market shares in the Nordic Equity Capital Markets, Corporate Bonds and Loan syndication in the first quarter of 2016.

The inflow to Nordea funds was the highest in Europe in the first quarter of 2016, EUR 4.1bn or 5.7% of AuM annualised. For the first time ever, a Nordea fund, Stable Return Fund, exceeded Assets under Management of EUR 10bn. Total assets under management grew EUR 2.7bn to EUR 290.9bn

Delivering on the Simplification programme

The Simplification programme is proceeding as expected. Initial simplification has contributed to a 70% reduction in products and solutions.

Temenos and Accenture were chosen as vendors for the Core Banking Platform. The model bank has been installed and we are now working towards piloting the new system in the summer.

Clear2Pay is the vendor for the payment platform (Global Payment Engine). In mid-February, the first Single Euro Payments Area (SEPA) interbank payments were handled out of Latvia.

The conversion from local to common data warehouses is developing according to plan. As of today, the local data warehouse in Norway has been converted and the remaining countries will be converted in 2016 and 2017.

At the AGM, shareholders approved the plans for the mergers of the Norwegian, Danish and Finnish banking subsidiaries with NBAB. Our intention is to execute on the merger plan in early January 2017. The changes to the legal structure depend among other on regulatory approvals and a satisfactory outcome of discussions with the local authorities.

Compliance, values and culture

To verify that the business activities in our Private Banking operations are in line with internal policies as well as external tax rules and anti-money laundering regulations we have initiated an investigation of these operations with internal and external resources, in full cooperation with all relevant authorities. We expect our investigation to be finalised during summer.

To address deficiencies highlighted by the Swedish Financial Supervisory Authority last spring, we established a Financial Crime Change Programme in June 2015 with a focus on ensuring robust group-wide standards and processes. As part of this, a central anti-money laundering unit is being established for know your customer, sanctions screening and transaction monitoring.

We are significantly strengthening the functions and processes devoted to regulatory compliance in general. "First line of defence", i.e. the units serving our customers, has the primary responsibility and a crucial role in being compliant. We are also strengthening the monitoring and advice function Group Compliance ("second line"). These efforts will ensure consistency and quality in our compliance work, and also that we will be more rigorous, efficient and competent in serving our customers.

Finally let me emphasise that all these efforts will only succeed if we continue to have a strong risk and compliance culture in place. When I assumed my position in November, I established a Business Ethics and Values committee headed by myself, to make it clear that values and ethical considerations are always an integral part of our business model. In light of the recent debate, it is more important than ever to speed up and enforce this work. As CEO, I will take all actions necessary to ensure that we stay a safe and trusted partner.

Casper von Koskull

Macroeconomy and financial markets

In the first guarter of 2016, the global economy grew by 3%, extending a trend with the lowest rate of expansion since 2009. In the advanced economies, growth continued to be driven by consumption and recovering labour markets, while emerging markets suffered from a recession in world trade, manufacturing and investments. In Europe, economic growth remained slow but positive in Q1, with private consumption being the key driver of economic activity. However, the low and sluggish inflation in Europe remained a concern for the governing council of the European Central Bank during the quarter. In order to spur inflation, the European Central Bank lowered its Deposit Facility Rate to -0.4% from -0.3%, while expanding the quantitative easing programme and introducing long-term refinancing operations. In the US, the economic recovery continued to be supported by strong labour- and housing markets, but there are also signs of late-cycle weakness with slow growth in manufacturing related to energy and mining as well as exports. The Federal Reserve has acknowledged the improving domestic data, but concerns about the global economy have led the Federal Reserve to leave policy rates unchanged in Q1. The year began with substantial risk aversion in financial markets with equity markets opening on a weak note. However, risk sentiment improved in February, and by the end of the quarter, European equity markets were 8% lower, whereas US markets were broadly unchanged. With easier monetary policy and low inflation expectations, fixed income assets were in great demand in Q1, with both US and German 10y yields 50bps lower than at the turn of the year. The more accommodative policy of the Federal Reserve led to a substantial weakening of the USD with EURUSD 4.8% higher in Q1.

Denmark

Economic indicators pointed to a relatively weak development in the Danish economy in the first guarter after an equally weak development through Q4 when the economy grew by only 0.1% q/q due to weakness in the export sector and public consumption, both showing an outright decline. The housing market softened in the first quarter after a long period of price increases, driven by low interest rates along with steady and broad-based labour market improvement. Inflation has been persistently subdued due to the downward pressure on commodity prices. The central bank increased the deposit rate by 10 bps to -0.65% in January as part of the normalisation of monetary policy. The international reserves fell by DKK 22bn to DKK412bn, below the level at the beginning of 2015. Danish equities fell by 6.5% in the first guarter while 10-year government bond yields dropped 50bps to 0.41%. The spread to the German 10-year rate fell by 5bps during Q1.

Finland

The Finnish economy has finally started to show mild signs of recovery after three consecutive years of negative

growth. In the first quarter however, macro data remained mixed again. On the one hand, exports and manufacturing continued to struggle as both were lower than a year earlier. On the other hand, domestic demand and economic sentiment looked a little brighter. Investments increased driven by a pick-up in construction and residential activity. Recent behaviour in terms of housing permits suggests that this pick-up might fade towards year end. New mortgages increased and house prices rose slightly following the usual seasonal pattern, even though housing sales showed signs of weakness. Private consumption has remained surprisingly resilient, supported by stronger than expected employment. For example, car registrations reached their highest level in 4-5 years. Finnish equities fell by 7% in the first quarter while the 10year government yield dropped 56bps to 0.44%.

Norway

Released data in the first quarter indicated that mainland growth remains close to zero, which is in line with the second half of 2015. Business survey figures and labour market data showed that the weakness was mainly due to continued downward pressure in oil-related industries. Meanwhile, the overall unemployment level was more or less unchanged in Q1. Consumer confidence and retail sales data have been generally weak while strong growth in the consumption of services has compensated for low demand in the consumption of goods. House prices increased strongly in Q1 while core inflation remained at elevated levels of around 3% y/y, predominantly caused by a previous weakening of the Norwegian currency. Norges Bank lowered key rates to 0.5% in March, and signalled that further easing could come later on this year. Norwegian equities fell 4% in the fourth quarter while 10year government yields dropped 38bps to 1.19%. The Norwegian krone strengthened by 3.4% in trade-weighted terms.

Sweden

The Swedish economy continued to show strength in Q1. GDP increased by 4.5% in Q4 2015 and underlying details revealed that domestic consumption grew at a robust pace while the export sector recovered somewhat. These trends seem to have continued in the beginning of 2016. Employment increased swiftly and unemployment declined to around 7%. The inflation outlook improved on the back of previous currency weakening, tax hikes and strong growth, but continued to remain below the Riksbank's 2%target. The Swedish central bank cut rates to -0.50% in February and remained open to additional easing, even though verbally it seemed less inclined to take further measures in subsequent communication. The Swedish trade-weighted exchange rate weakened in the beginning of 2016, but regained strength and ended the first quarter unchanged from the turn of the year. Swedish equities were down by 6% during the guarter while 10-year government yields dropped 46bps to 0.80%.

Group results and performance

First quarter 2016

Net interest income

Net interest income was down 2% in local currencies and down 3% in EUR from the previous quarter at EUR 1,168m. Net interest income came down in business areas as deposit margins decreased due to lower market rates. Lending margins were up somewhat in the quarter but not enough to offset the continued pressure on deposit margins. Funding costs were largely unchanged in the quarter.

Net interest income for Retail Banking was down 3% in local currencies, mainly driven by re-distribution of funding costs from Group Corporate Centre for 2015, one less interest day in the quarter and lower deposit margins following further reduced rates in Finland, Norway and Sweden. Lending margins increased somewhat.

Net interest income in Wholesale Banking was down 12% in local currencies, mainly driven by re-distribution of funding costs from Group Corporate Centre for 2015, slightly lower deposit margins and yield fees, as well as one less interest day.

Net interest income in Wealth Management was down EUR 10m in the quarter to EUR 26m from a strong level in previous quarter.

Net interest income in Group Corporate Centre increased to EUR 131m compared to EUR 102m in the previous quarter. The increase was mainly related to internal redistribution of funding costs, while the underlying level is largely unchanged.

Lending volumes

Loans to the public in local currencies, excluding repos, were largely unchanged from the previous quarter and up somewhat from the same quarter in 2015. Average lending volumes in local currencies in business areas were up somewhat from the previous quarter and increased 2% from the first quarter of 2015, with somewhat higher growth in Norway and Sweden.

Deposit volumes

Total deposits from the public in local currencies, excluding repos, increased 1% from the previous quarter and 7% from the same quarter in 2015. Average deposit volumes in local currencies in business areas were up 1% from the previous quarter and up 5% from the first quarter of 2015.

Net fee and commission income

Net fee and commission income decreased 6% in local currencies from the previous seasonally strong quarter.

Savings and investments commissions

Net fee and commission income from savings and investments decreased 6% in local currencies from the previous quarter to EUR 455m mainly due to lower average Assets under Management (AuM) in the quarter. AuM increased to EUR 290.9bn at the end of the quarter following a continued strong inflow. Net inflow amounted to

EUR 4.1bn in the quarter, or 5.7% of AuM annualised. Market return affected AuM negatively by EUR 1.4bn. Performance fees were largely unchanged in the quarter. Corporate finance fees were down EUR 7m in the quarter.

Payments and cards and lending-related commissions
Lending-related net fee and commission income decreased
2% in local currencies to EUR 177m from the previous
quarter. Payments and cards net fee and commission
income was down 7% from the previous quarter.

Net result from items at fair value

The net result from items at fair value decreased from EUR 421m in the previous quarter to EUR 332m. Fair Value Adjustments had a negative impact of EUR 93m (positive impact of EUR 48m in previous quarter).

Capital Markets income for customers in Wholesale Banking, Retail Banking and Private Banking
The customer-driven capital markets activities held up well in the quarter and generated a net fair value result in the customer business of EUR 191m compared to EUR 195m in the previous quarter.

Life & Pensions

The net result from items at fair value for Life & Pensions increased EUR 21m from the previous quarter to EUR 86m. The increase in the quarter is mainly due a full release of the fee reservation account in Denmark.

Wholesale Banking other

The net fair value result for Wholesale Banking other, i.e. income from managing the risks inherent in customer transactions, decreased to EUR 36m from EUR 108m in the previous quarter following challenging market conditions as well as negative effect from Fair Value Adjustments.

Group Functions and Other and eliminations
The net fair value result in Group Corporate Centre
decreased to EUR 25m from EUR 31m in the fourth quarter
following large spread movements in the quarter. In Other
and eliminations, the net result from items at fair value
decreased EUR 28m to EUR -6m mainly due to a negative
impact from structured bonds.

Total expenses

Total operating expenses in the first quarter amounted to EUR 1,178m, down 2% from the previous quarter and unchanged from the first quarter of 2015 in local currencies and adjusted for non-recurring items.

Staff costs were down 1% from the previous quarter in local currencies adjusted for non-recurring items driven by lower provisions for performance-related salaries. Other expenses were down 5% in local currencies as IT, marketing and traveling costs were down due to seasonality. Depreciation was down 3% in local currencies from the previous quarter, adjusted for non-recurring items.

The number of employees (FTEs) at the end of first quarter increased 2% compared to the previous quarter and 3% from the same quarter of 2015. Investments in compliance and IT as well as substitution of external consultants increased the number of FTEs.

Provisions for performance-related salaries in the first quarter were EUR 58m, compared to EUR 82m in the previous quarter.

The cost-to-income ratio, excluding non-recurring items, was 51.3% in the first quarter, up from 49.1% in the previous quarter.

Net loan losses

Net loan loss provisions decreased to EUR 111m and the loan loss ratio was 13 basis points (EUR 142m and 17 basis points in the previous quarter). Loan losses decreased from the previous quarter in Retail Banking Denmark, Retail Banking Finland and Baltics, while they increased somewhat in Retail Banking Norway and Shipping, Oil and Offshore. The other areas were relatively stable.

Credit portfolio

Total lending to the public, excluding reversed repurchase agreements, amounted to EUR 309bn, largely unchanged

from the previous quarter in local currencies. Overall, the credit quality of the loan portfolio remained solid in the first quarter, with a slightly positive effect from migration in both the household portfolio and the corporate portfolio.

The impaired loans ratio increased to 165 basis points of total loans (162 basis points in the previous quarter). Total impaired loans gross increased by 2% from the previous quarter. The non-performing part of impaired loans increased to 42% of impaired loans (38% in the previous quarter). The provisioning ratio decreased to 43% (45% in the previous quarter)

¹ Non-recurring items (Q4 2015: gain from divestment of Nordea's merchant acquiring business to Nets of EUR 176m before tax and restructuring charge of EUR 263m).

First quarter 2016 compared to first quarter 2015

Total income was down 14% in local currencies (-16% in EUR) from last year and operating profit was down 27% in local currencies (-29% in EUR) from last year.

Income

Net interest income was down 4% in local currencies (down 7% in EUR) from last year. Average lending volumes in local currencies in business areas increased 2% from the first quarter of 2015. Average deposit volumes in local currencies in business areas increased 5% from the first quarter of 2015, mainly driven by Retail deposits in Sweden and Finland and corporate deposits in Norway. Lending margins were up somewhat, while deposit margins were down significantly compared to one year ago.

Net fee and commission income decreased 4% in local currencies (-5% in EUR). Net result from items at fair value decreased 48% in local currencies (-47% in EUR) from a very strong first quarter of 2015.

Expenses

Total expenses were unchanged in local currencies (-1% in EUR) from the previous year and amounted to EUR 1,178m. Staff costs were down 4% in local currencies (-5% in EUR).

Net loan losses

Net loan loss provisions decreased to EUR 111m, equalling a loan loss ratio of 13 basis points (14 basis points for the first quarter of 2015).

Net profit

Net profit decreased 26% in local currencies (-28% in EUR) to EUR 782m.

Currency fluctuation impact

Currency fluctuations had a reducing effect of 1 %-point on income and expenses as well as on loan and deposit volumes compared to a year ago.

Other information

Capital position and risk exposure amount, REA

Nordea Group's Basel III Common equity tier 1 (CET1) capital ratio increased to 16.7% at the end of the first quarter 2016 from 16.5% at the end of the fourth quarter 2015. The increase to the CET1 capital ratio was due to an increase in common equity tier 1 capital due to a pay out from Nordea Life and Pension offset by an increase to the additional risk exposure amount buffer.

The tier 1 capital ratio increased to 18.7%, up 20bps compared to previous quarter and the total capital ratio increased from 21.6% to 21.8%.

REA was EUR 143.1bn, a decrease of EUR 0.2bn compared to the previous quarter. The decrease is a combination of decreased credit risk for IRB portfolios mainly due to improved credit quality partly offset by both increased market risk for internal models and an increase to the additional risk buffer held in line with article 3 in CRR.

The CET1 capital was EUR 23.8bn, the tier 1 capital was EUR 26.7bn and the own funds were EUR 31.3bn. The capital requirement based on Basel 1 transitional rules was EUR 17.6bn and the adjusted own funds were EUR 31.1bn.

The CRR leverage ratio decreased 10bps to 4.4% compared to the fourth quarter and including profit to 4.5%. The leverage ratio is calculated in accordance to the delegated regulation 2015\62.

Economic Capital (EC) was at the end of the first quarter EUR 27.0bn, which is an increase by 2.0bn compared to previous quarter. The increase is due to the yearly update of the Pillar II framework in response to the SREP process and increase in mainly within the credit risk. The impacts from the buffers are EUR 0.1bn in Pillar 1 and EUR 0.8bn in Pillar 2. Market risk had a small total change and operational risk increased by EUR 0.4bn. The overall income in the model decreased, while the pillar 2 add-on increased from 25% to 50% following the new EC framework. Capital deductions increased economic capital

by EUR 0.1bn driven by increases in intangibles and prudent valuation.

The Group's Internal Capital Requirement (ICR) was at the end of the first quarter EUR 15,345, an increase of EUR 128m compared to the previous quarter. The ICR should be compared to the own funds, which was EUR 31,253m at the end of the first quarter. The ICR is calculated based on a Pillar I plus Pillar II approach. For more detailed information about the ICR methodology see the Capital and Risk Management Report.

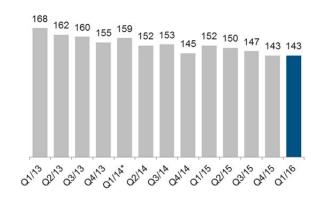

Regulatory developments

On 15 March Finansinspektionen decided to increase the countercyclical capital buffer rate in Sweden to 2% as of 19 March 2017. The buffer rate is currently 1% and will be increased to 1.5% as of 27 June 2016.

Nordea's funding and liquidity operations

Nordea issued approx. EUR 9.3bn in long-term funding in the first quarter excluding Danish covered bonds and subordinated notes, of which approx. EUR 6.5bn represented the issuance of Swedish and Norwegian covered bonds in domestic and international markets. Notable benchmark transactions in the quarter were a 3Y GBP 400m covered bond issued in January by Nordea Eiendomskreditt (tapped by an additional GBP 100m also in January) and in February a EUR 2bn dual tranche senior unsecured issuance out of NBAB, split by a EUR 750m 3Y FRN and a EUR 1.25bn 7Y Fixed rate bond.

Nordea's long-term funding portion of total funding was, at the end of the first quarter, approx. 83%.

Short-term liquidity risk is measured using several metrics and the Liquidity Coverage Ratio (LCR) is one such metric. LCR for the Nordea Group was, according to the Swedish FSA's LCR definition, 155% at the end of the first quarter. The LCR in EUR was 174% and in USD 230% at the end of the first quarter. LCR for the Nordea Group according to CRR LCR definitions was 154% at the end of the first quarter. The liquidity buffer is composed of highly liquid central bank eligible securities with characteristics similar to Basel III/CRD IV liquid assets and amounted to EUR 60bn at the end of the first quarter (EUR 60bn at the end of the fourth quarter).

Market risk

Total market risk, measured as Value at Risk, in the banking book amounted to EUR 90m. The increase in Interest Rate Risk in the banking book is mainly driven by

increased exposure to DKK Government Bonds and USD Government & SSA Bonds. Total market risk, measured as Value at Risk, in the trading book amounted to EUR 36m.

Nordea share

In the first quarter, Nordea's share price on the Nasdaq Stockholm Exchange depreciated from SEK 93.3 to SEK 78.0.

Annual General Meeting

The AGM on 17 March $201\overline{6}$ decided on a dividend of EUR 0.64 per share.

The AGM approved an authorisation for the Board of Directors to decide on issuing of convertible instruments, with or without preferential rights for existing shareholders, to be conducted on market terms, and increasing the share capital by a maximum of 10%. The purpose of the authorisation is to facilitate a flexible and efficient adjustment of the capital structure to meet new capital requirements and the attaching instruments.

As announced in the interim report for Q2 2015, Nordea seeks to simplify its legal structure by changing its subsidiary banks Nordea Bank Denmark A/S, Nordea Bank Finland Abp and Nordea Bank Norge ASA to branches of Nordea. The AGM approved the merger plans. The mergers are expected to take place in early January 2017.

Delivering on the Simplification Programme

In the coming years we will execute on our transformational change agenda in order to generate a truly digital bank and to deliver on the future relationship bank. The Simplification programme is crucial to making this possible and has now been running for a year and a half.

Through the programme, we are building three new platforms: Core banking platform, Payment platform and Information platform with Group common data. These will work together and, with the benefit of increased agility, scale and resilience, enable greater customer orientation and flexibility. The programme is proceeding as expected. At the same time, we are building up change capabilities to the benefit of the entire organisation in order to meet future needs and our constantly evolving environment. The initial simplification has simplified our products, data and processes. So far it has contributed to a 70% reduction in products and solutions.

Temenos and Accenture were selected as vendors for the Core Banking Platform. The model bank has been installed and we are now working towards piloting the new system in the summer.

Clear2Pay is the vendor for the Payment Platform. An important milestone was reached in mid-February, when the first SEPA interbank payments were handled via our new Global Payment engine out of Latvia. The next steps will be to add Euro Interbank transactions from the remaining Baltics, Nordic, non-Euro countries and UK and finally Finland.

The conversion from local to common data warehouses is another major element to ensure simplification. As of today, local data warehouses in Finland and Norway have migrated to Group Common Data Warehouse and the remaining countries are close to conversion.

Visa Inc.'s proposed acquisition of Visa Europe Ltd.

Visa Inc. and Visa Europe Ltd. have announced an agreement for Visa Inc. to acquire Visa Europe. The transaction is subject to regulatory approvals and is expected to be closed in the second quarter of 2016. Nordea is a shareholder and member in Visa Europe and expects to recognise a gain following the closing of the transaction. Compared with the information disclosed in Nordea's Annual Report 2015, Visa has announced

changes to the terms. The revised terms of the agreement provide for an additional guaranteed cash payment of EUR 1.87bn to the sellers, while the earn-out mechanism has been removed. Nordea's adjusted pre-tax gain is expected to be within the range of EUR 145m to EUR 165m in cash, with an additional possible gain on preferred stock amounting to around 20% of the cash portion.

Compliance risk

Supervisory authorities are conducting investigations with regards to Nordea's compliance in several areas. e.g. investment advice and AML. The outcome of some investigations is pending and it cannot be ruled out that these investigations could lead to criticism or sanctions.

Following the publication of the 'Panama-papers' the Swedish FSA and other authorities in markets where Nordea operates have put forward information requests related to customers with offshore structures, and Nordea's role in relation thereto. These inquiries are in an initial phase and the outcome too early to assess.

Total cash and cash equivalents	53,444	49,872	40,200

Cash comprises legal tender and bank notes in foreign currencies. Balances with central banks consist of deposits in accounts with central banks and postal giro systems under government authority, where the following conditions are fulfilled:

Loans to credit institutions, payable on demand include liquid assets not represented by bonds or other interest-bearing securities.

⁻ the central bank or the postal giro system is domiciled in the country where the institution is established.

⁻ the balance on the account is readily available at any time.

Accounting policies

The information presented in this Interim Management Statement follows the guidelines for Interim Management Statements issued by Nasdaq OMX. This Interim Management Statement is not presented in accordance with IAS 34 "Interim Financial Reporting".

The accounting policies and methods of computation are largely the same as for the Annual Report 2015. For more information see Note G1 in the Annual Report 2015. For changes implemented during 2015, see "Changed accounting policies and presentation" below.

Changed accounting policies and presentation

The following amendments published by the IASB were implemented 1 January 2016 but have not had any significant impact on Nordea's financial statements:

- Amendments to IFRS 11 "Accounting for Acquisitions of Interests in Joint Operations"
- IAS 1 "Disclosure Initiative"
- Amendments to IAS 16 and IAS 38 "Clarification of Acceptable Methods of Depreciation and Amortisation"
- Annual Improvements to IFRSs, 2012-2014 Cycle

Amendments have in addition been made in the Swedish Annual Accounts Act for Credit Institutions and Securities Companies (1995:1559) which have been implemented 1 January 2016. These amendments have not had any significant impact on Nordea's financial statements.

The Swedish Financial Supervisory Authority has amended the accounting regulation FFFS 2008:25 by issuing FFFS 2015:20. Those amendments were

implemented by Nordea 1 January 2016 but have not had any significant impact on Nordea's financial statements.

The Swedish Financial Reporting Board has amended the accounting recommendation for groups by issuing "RFR 1 Supplementary Accounting Rules for Groups – January 2016". These changes were implemented by Nordea 1 January 2016 but have not had any significant impact on Nordea's financial statements.

Changed presentation of pooled schemes and unitlinked investment contracts

Nordea invests in interest-bearing securities and shares on behalf of customers, in pension pools and unit-linked investment contracts, where the customers bear the investment risk. Such assets have been reclassified to the separate balance sheet line "Assets in pooled schemes and unit-linked investment contracts" in order to disclose them separately from assets for which Nordea bears the investment risk. The corresponding liabilities to customers have been reclassified to the separate balance sheet line "Deposits in pooled schemes and unit-linked investment contracts" following that these liabilities behave differently than the normal deposits received from customers.

The comparable figures have been restated and the impact on the current and comparative periods can be found in the below table. The change in presentation has not had any impact on the income statement or equity.

Changed presentation of refinancing fees and payout fees

Refinancing fees and pay-out fees received in connection with mortgage lending in Denmark have been reclassified from "Net result from items at fair value" to "Net fee and commission income" in the income statement, in order to align with Nordea's classification policy for loan processing fees. A refinancing fee is charged when an adjustable rate mortgage loan is refinanced, and a pay-out fee when a loan is initially paid out. The comparable figures have been restated and the impact on the current and comparative periods can be found in the below table.

Balance sheet (at end of period)

The change in presentation has not had any impact on the balance sheet or equity.

Changed presentation of stability fees

Nordea has, in order to align with local market practice, reclassified state guarantee fees from "Net fee and commission income" to "Net interest income". The comparable figures have been restated and the impact on the current and comparative periods can be found in the below table. The change in presentation has not had any impact on the balance sheet or equity.

Business definitions

Return on equity

Net profit for the year excluding non-controlling interests as a percentage of average equity for the year. Average equity including net profit for the year and dividend until paid, non-controlling interests excluded.

Total shareholders return (TSR)

Total shareholders return measured as growth in the value of a shareholding during the year, assuming the dividends are reinvested at the time of the payment to purchase additional shares.

Risk-adjusted profit

Risk-adjusted profit is defined as total income minus total operating expenses, minus Expected losses and standard tax. In addition, Risk-adjusted profit excludes major non-recurring items.

Tier 1 capital

Proportion of the capital base, which includes consolidated shareholders' equity excluding investments in insurance companies, proposed dividend, deferred tax assets and intangible assets in the banking operations. Shortfall is deducted 100% in CET1 – the negative difference between expected losses and provisions. Subsequent to the approval of the supervisory authorities, Tier 1 capital also includes qualified forms of subordinated loans (Tier 1 capital contributions and hybrid capital loans). The Common Equity Tier 1 capital constitutes the Tier 1 capital excluding hybrid capital loans.

Tier 1 capital ratio

Tier 1 capital as a percentage of risk exposure amount. The Common Equity tier 1 capital ratio is calculated as Common Equity Tier 1 capital as a percentage of risk exposure amount.

Loan loss ratio

Net loan losses (annualised) divided by the quarterly closing balance of loans to the public (lending).

Impairment rate, gross

Individually assessed impaired loans before allowances divided by total loans before allowances.

Impairment rate, net

Individually assessed impaired loans after allowances divided by total loans before allowances.

Total allowance rate

Total allowances divided by total loans before allowances.

Allowances in relation to impaired loans

Allowances for individually assessed impaired loans divided by individually assessed impaired loans before allowances.

Total allowances in relation to impaired loans (provisioning ratio)

Total allowances divided by total impaired loans before allowances.

Non-performing, not impaired

Past due loans, not impaired due to future cash flows (included in Loans, not impaired).

Expected losses

Expected losses reflect the normalised loss level of the individual loan exposure over a business cycle as well as various portfolios.

Economic Capital

Economic Capital is Nordea's internal estimate of required capital and measures the capital required to cover unexpected losses in the course of its business with a certain probability. EC uses advanced internal models to provide a consistent measurement for Credit Risk, Market Risk, Operational Risk, Business Risk and Life Insurance Risk arising from activities in Nordea's various business areas. The aggregation of risks across the group gives rise to diversification effects resulting from the differences in risk drivers and the improbability of unexpected losses occurring simultaneously.

ROCAR

ROCAR, % (Return on Capital at Risk) is defined as Net profit as a percentage of Economic capital. For Business Areas it is defined as Operating profit after standard tax as a percentage of Economic capital.

For a list of further business definitions, see the Annual Report.

Stockholm 27 April 2016

Casper von Koskull President and Group CEO

This Interim Management Statement has been prepared in accordance with the Nasdaq guidelines for preparing interim management statements.

This Interim Management Statement has not been subject to review by the Auditors.

This Interim Management Statement is published in one additional language version, in Swedish. In the event of any inconsistencies between the Swedish language version and this English version, the English version shall prevail.

The information provided in this press release is such, which Nordea is required to disclose pursuant to the Swedish Financial Instruments Trading Act (1991:980) and/or the Swedish Securities Markets Act (2007:528).

This Interim Management Statement contains forward-looking statements that reflect management's current views with respect to certain future events and potential financial performance. Although Nordea believes that the expectations reflected in such forward-looking statements are reasonable, no assurance can be given that such expectations will prove to have been correct. Accordingly, results could differ materially from those set out in the forward looking statements as a result of various factors. Important factors that may cause such a difference for Nordea include, but are not limited to: (i) the macroeconomic development, (ii) change in the competitive climate, (iii) change in the regulatory environment and other government actions and (iv) change in interest rate and foreign exchange rate levels. This Interim Management Statement does not imply that Nordea has undertaken to revise these forward-looking statements, beyond what is required by applicable law or applicable stock exchange regulations if and when circumstances arise that will lead to changes compared to the date when these statements were provided.
